

**"Hate speech" experts visit
Thessaloniki, Greece, 14-16 October 2020**

The general outfit is to speak about hate speech in Greece, especially the one coming from the political landscape. For this, we will meet with experts (academics, civil society agents and politicians) who will share their views or research results, especially the last months when the pandemic ignited the debate over politics. In addition, the outcomes of the pan-European research will be presented.
